**RE: A New Year, Another Home Start!**

Above: Another foundation is poured just in time for an early Christmas present.

With the Holiday Season safely behind us, construction continues at SMRR. The slab you see in the picture above was poured just a couple of days before Christmas. What a great Christmas present for these lucky SMRR lot owners. This slab will soon be the first home on the western most area of the lake system and will be the first home that you see as you enter SMRR off of Scull Road.

Construction has also started on the restroom/storage structure near the circle drive in the main park area. This building will compliment the dock and finger pier very nicely and will most certainly come in handy during tournaments, and other events that may take place at SMRR.

As the New Year starts with a frenzy of activity, we can't help but wonder who will be next to build?

That's all from here for now. Happy New Year!

See you on the water!
