RE: Home Construction Continues at SMRR!

Above: Home Construction Continues at SMRR

Home construction continues at SMRR. This beautiful new structure will soon be home for another lucky SMRR family. Construction on the restroom Cabana building near the marina at the northern end of the eastern most ski run is moving along as well. The hot mix asphalt has been put down and about half of the cinder blocks are up. The Club Boat is docked in the marina right next to it ready and waiting for the next ski ride. And just as importantly, blue skies and green grass are starting to become the norm again.

As the weather gets warmer and the days get longer you can expect to see folks getting ready for a summer filled with skiing, friendship and family fun. Come be a part of the excitement at SMRR, we'd love to have you.

See you on the water!
